

BOW VALLEY RESOURCE

Including Arrowwood, Milo, Queenstown, Shouldice and Mossleigh

Volume 2, No. 3

ARROWWOOD, ALTA., SEPTEMBER 1, 1932

Subscription \$2.00, U.S.A. \$2.50

Local and Personal

The Arrowwood school reopens on Monday, Sept. 5th.

The famous allhouse cover scribbles, either for pencil or pen, 9 for 25c at the Drug Store.

Mr. H. McCollough returned from his holidays on Wednesday.

Mr. Corey was down from Calgary on Wednesday afternoon visiting his farm East of town.

Mrs. P. H. Coleman will be in Arrowwood to resume piano class work and private lessons first Tuesday in September.

Mr. and Mrs. R. H. Bishop and family returned home on Sunday evening after spending their holidays at Banff and Edmonton.

Miss Holmes, teacher in the Banff school left Wednesday for that city. She has been visiting with Mr. and Mrs. R. E. Hill.

Rev. V. M. Gilbert will conduct Sacrament Services in the Queenstown - Milo circuit next Sunday. Rev. J. G. Brown will preach in the Arrowwood United Church.

Malcolm Taylor, popular young student of Arrowwood, left for Banff on Wednesday morning, where he will continue his senior matriculation course at the Banff High School. Being active in all local activities, he will be greatly missed here by his many friends, who wish him success in all his future undertakings.

The Alberta Pacific Grain Company Ltd.

COMMENCING business in the North-West Territories in 1901—four years prior to the formation of the Province of Alberta—The Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland, and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

ALBERTA Grain Company, Limited, under the able management of John I. McFarland, commenced business in 1901. Total production of wheat in Western Canada in that year had reached into the 65,000,000 bushels. Under Mr. McFarland's policy of fair dealing with all farmers, the growth of the Company kept pace with increasing wheat production in the West. In 1912 Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland, and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organization continued to grow. Its elevators followed the railway construction crews into the newly cultivated areas of Alberta and extended its operations into Saskatchewan and Manitoba. WITH the completion of the building of the Panama Canal the "A.P." became a pioneer in the movement of grain to import markets through the Western route. Terminal elevators, having a capacity of 6,500,000 bushels have been acquired by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial stress of 1907-08; the war and its aftermath; boom periods and the business upsurge of the past three years—a period of years, many of which have been obscure and filled with business uncertainties. In all its three decades of dealing with thousands of farmers and the handling of hundreds of millions of bushels of grain, the Company has never failed in an obligation to any client. Among its customers today are growers of Alberta who drew the first bushel of grain they produced in the Province to an "A.P." elevator.

FAIR-DEALING with its customers, coupled with competent office and field staffs; efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system into its humble beginning in 1901 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are and will continue to be, those of the founder of the "A.P." system.

Mr. Christenson's two sisters Miss B. Christenson and Miss I. Christenson, from Chicago, Ill., are visiting with him for a short time. Miss Carol Christenson intends to return with them and attend school in Chicago.

The Ladies' Guild of the United Church will hold their monthly home cooking sale and tea in L.F. Christenson's store on Friday, Sept. 3rd. During the busy season the sales are being held in the evening instead of the afternoon.

The first carload of wheat shipped from Arrowwood this year was loaded by S. M. and Frank Burger, through the Pool Elevator. This wheat, which is "Reward," weighed 64½ lbs. to the bushel and graded No. 1 Hard. The yield was about 35 bushels to the acre. The second car was shipped by F. P. Dettler and W. M. Burris, weighing 63½ lbs. to the bush, and was also shipped through the Pool. The grain is exceptionally clean this year.

Farewell Party for Malcolm Taylor

About fifteen young people from around town met at the Taylor home on Tuesday evening—the occasion being a farewell for Malcolm who was leaving the following day to resume his studies in Banff.

The evening, which was spent in card playing and dancing was climaxed by the serving of a splendid corn supper.

After wishing Malcolm every success, the guests departed at nearly hour, being mindful that the next day's journey meant an early rising.

U.G.G. Announces Payment of Five Per Cent Dividend

United Grain Growers Limited have announced the payment of a dividend at the rate of five per cent on the paid up capital stock of the company out of earnings for the fiscal year ending July 31st, 1932. In making the announcement during the course of a directors' meeting held at Calgary, R. S. Law, president of the company stated that the earnings of the company had been sufficient to pay bond interest, to provide

full depreciation, and after payment of the dividend to permit of a satisfactory addition to the surplus accounts of the company.

Dividend cheques will be mailed from the office of the company on September 1st, to shareholders of record at July 31st, 1932.

Ready for School

School days will soon be here again. When they come, every school child will be outfitted with books, pens and pencils. These things he needs so that he may be prepared to do his school work. Much more does he need to be provided with good health if he is to make a real success of his school days. Apparently large number of apparently healthy children have certain physical development. The most common defects are those of the teeth, tonsils, adenoids and eyes. Other fairly common defects are those of hearing and nutrition. It is obvious that the child who has one or more such defect cannot do as well in his school work as he would if he were free from these defects. A child who cannot hear or see properly, a child suffering from toothache, or a child whose head is stuffed-up with adenoids cannot be expected to be alert and give his full attention to his work.

Indeed, this was so obvious that some years ago there was organized, in many places, a system to provide for the examination of school children. One purpose of the examination is to discover the presence of defects and to advise parents to have the discovered defects given the necessary attention.

To the parent this physical examination provides helpful information as to what his child needs to attain a good standard of health. The younger the child the easier it is to correct most defects. Even the more trivial defects should be corrected at once so that the child may get the most out of his time in school and so be better prepared for life.

It is unwise to wait until a child starts to school to find out if he has any defects. Many parents secure the advice of their family doctor during the

pre-school years and so, when school time comes, their child is practically prepared.

In addition to being freed from physical defects the child should enter school armed with protection against smallpox and diphtheria. In some provinces the law requires vaccination against smallpox. Diphtheria each year takes away health and life from many children. This need not be the case, for we can prevent diphtheria by means of diphtheria immunization. Every baby towards the end of his first year of life, should be immunized, and every child, as part of his preparation for school should be protected against diphtheria—Health Service of the Canadian Medical Association

The Late Jerry Carpenter

The following information regarding the late Jerry Carpenter, who met his death in a truck accident near Mossleigh on August 15th, is taken from a paper handed in by Mr. A. Forning:

"Mr. Carpenter came to Pre-late twenty-one years ago. He was born July 29th, 1887 in Avalon, Mo., where he received his early schooling later receiving his B.S. Degree in Virginia.

"In addition to his wife, Mr. Carpenter is survived by three sons, Roy aged 13, Leo 12 and Gene 5. Also his mother, one sister and one brother.

"At the time of his death he was Exalted Ruler, B.P.O.E. Lodge, Pre-late, worthy Patron, O.E.S., Harmony Chapter, Secretary and member of A.F. & A.M. Also president of the Pre-late Boy Scouts, No. 383 and president of the Pre-late Rural Telephone Co.

"The funeral, which was the largest ever held in Pre-late, took place on Thursday morning, the Rev. L. C. Scott, Anglican Minister of Carri having charge of the service which was held in the Elks' Home, which was crowded to its utmost capacity, a large number having to remain outside.

"At the graveside, the Rev. L. C. Scott conducted the funeral service after Mr. McCue of Gull Lake delivered the Elks' Ritual.

"The many floral tributes showed the respect in which he was held.

"On September 4 at 3 o'clock in the afternoon the Boy Scouts will hold a memorial service, to pay their respects to their late chairman of the Local Scout Association."

Toronto Conservatory Examination Results

Following are the Results of Toronto Conservatory exams, pupils of Mrs. P. H. Coleman, of Milo:

LOMOND PUPILS

Reatha Hannah, Introductory Piano, honors; Ethel Hannah, Introductory Piano, honors.

MIL0 STUDENTS

Ellen Brinker, Jr. Har-mony, pass; Ellen Brinker, Jr. Piano, pass; Patricia Coleman, Primary Piano, pass.

ARROWWOOD

Dorothy Heathcote, Introductory Piano, pass.

Card of Thanks

Mrs. Jerry Carpenter, Pre-late, Sask., wishes to thank all those who were so kind to her son, Roy, also to convey her sincere thanks to all who so unselfishly gave their time in removing the truck off her dead husband.

Why Not Try Pool Elevators?

Alberta Pool elevators are now operated under public license and are in a position to handle any grower's grain on the open market basis.

The excellent patronage extended to these Pool elevators during the immediate past crop year, by many growers who were never members of the Wheat Pool is testimony to the favorable reputation enjoyed by this co-operative elevator organization.

The Alberta Pool elevators are being operated on a basis of no discrimination between customers and with the definite policy of extending fair and equitable treatment to all persons using its facilities. Why not give the Pool elevator a trial?

Arrangements can be made to pool any proportions of a member's grain to suit his desire. Information regarding this can be furnished by your Pool agent.

ORANGE PEKOE BLEND

"Fresh from the Gardens"

The Holding Of Conferences

The holding of conferences has become such a common practice since the close of the Great War, and, considering the magnitude of world problems still calling for solution, so little has apparently been accomplished, that many people are inclined to question the utility of such gatherings and to be critical of the comparatively heavy expense which they entail. Within recent months, for example, there has been the international conference on disarmament held at Geneva, the Lausanne conference on war debts and reparations, the Imperial Economic Conference at Ottawa on preferential trade within the British Empire, and very shortly a world economic conference is to assemble at London, England. Are they worth while, and have they really accomplished anything, people are asking.

There are, of course, certain types of people who belittle all attempts to remedy evil and achieve reforms by way of negotiation and compromise. They predict failure for each conference in advance of its meeting, perhaps, in many cases, the wish being rather to the prediction, because they hold to the view that the existing financial and economic system of the world cannot be remedied but must be torn up root and branch, completely destroyed, and replaced by an entirely different system founded on new principles. Others, less radical, have seemingly lost confidence in the ability or willingness of the nations to abandon their extremely selfish nationalistic policies and programmes and work together for the common good of all.

While progress has been made, and many of the world's most disappointing in the tangible results accomplished, it would be a great mistake to regard them as failures. For example, while the world still has a long way to travel along the road of total disarmament, it is travelling in that direction, as witness the real advance made in the limitation in the number, size, and power of naval craft to be maintained by the leading maritime nations. Disarmament can only be brought about by a restoration of confidence and trust among peoples; it is a matter of education and each conference held is a mighty factor in enlightening people's minds and stirring their consciences. Such conferences help each nation to more fully understand and appreciate the viewpoint of other nations. And this is an essential first step to definite action.

Complete failure was predicted in advance for the Lausanne conference on war debts and reparations. Of course it did not achieve everything that was hoped of it. No conference ever does, probably never will. But the Lausanne conference did, as is now almost universally admitted, accomplish a great deal for the peace of mind and stirring the consciences. It was a settlement of this most vexing problem which has been an outstanding obstacle to the world's restoration to financial and economic health.

Failure was likewise predicted for the Imperial Economic Conference at Ottawa. Whatever its accomplishments, and these will not be fully known until the details of the agreements signed are laid before the respective parliaments of the Empire, the conference did not fail in failure. It failed of course to reach all the decisions that many people desired, and, on the other hand, it failed in the eyes of others because it reached decisions to do things not acceptable to them. Where so many conflicting interests had to be reconciled, and, failing complete agreement, compromises reached, it follows that what is regarded by some as a success by one group is a failure by another by the opposing group, and vice versa. The main thing is that each component part of the Empire now understands the position, problems and economic difficulties of all other parts as never before, and they are displaying a willingness to go as far as possible in solving those problems and overcoming those difficulties. That is all gain, and full of promise for the future. The conference really sounds the death-knell of extreme trade restrictionist policies and unlocks the door of freer and wider Empire trade. This must inevitably lead to freer and wider world trade.

Finally, those who are critical and skeptical of the value of these conferences will do well to remember that in olden days nations did not trouble very much to confer about their difficulties and strive to find a way out compatible with the dignity and interests of all; rather they were glad to find even the smallest excuse to wage war on each other. The world is turning away from that barbarism, and conferences are the medium, slow and tedious perhaps, but the only way, to bring about peace and lasting peace. True, international conferences cost money, fairly large sums some times, but a mere bagatelle to the tremendous cost of war.

A Costly Lawsuit

Customer Of Paris Underground Railway Had No Case

A lawsuit which lasted six years has just been concluded in Paris. The amount at issue was five centimes. Apparently, after a book of tickets for the Metro, the Paris underground railway, had been bought, fares were raised, and a supplementary charge of five centimes was demanded when one of the tickets was presented. The result was that, in the final result, more beneficial and lasting, replacing war. True, international conferences cost money, fairly large sums some times, but a mere bagatelle to the tremendous cost of war.

Two Exceptions

An Irish magistrate, one of the old school, was summoned up a case in a Dublin court. The plaintiff, a very handsome woman, and her good-looking daughter was one of the witnesses.

"Gentlemen of the jury," said his honor, "everything in the case seems plain—except, of course, Mrs. O'Toole and her charming daughter."

Troubled With Her Children Having Summer Complaint

Mrs. J. R. Montgomery, Ave. K. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint. In fact, several times every summer they were subject to attacks."

"I have been using Dr. Williams' Pink Pills for Pale People, and I have been very happy to be the most effective remedy I have ever known. It has helped me to keep my children healthy and happy, and I have been able to keep them from having summer complaint."

"I think to Dr. Williams' I no longer dread the summer months."

More Divorces In West

Increase In Shown In The Four Western Provinces

Divorces, is decreasing in Quebec, Ontario, Nova Scotia, Prince Edward Island and the Yukon, but in New Brunswick, Manitoba, Saskatchewan, Alberta, British Columbia and the North West Territories it is increasing according to figures taken at the census by the Dominion Bureau of Statistics. There are in all Canada 744 divorced persons as compared with 7401 ten years before. They numbered 4,400 in 1912, and only 661 in 1901.

The striking feature of the divorce situation in Canada is that in the old provinces with an older Canadian population, more homogeneous and with more of its population province-born, divorces have decreased. But in the newer provinces where there has been a larger percentage of incoming population divorce has increased. The most notable example of this is British Columbia where the proportion of those born outside the province is the greatest in Canada, the greatest increase in divorce has taken place.

The increase in British Columbia is 62 in a decade, or from 1,030 to 1,092. That increase is greater than the total increase in Canada which was only some 1,000. In the western provinces, the category of non-province-born, increased 312, or from 102 to 1,014. Manitoba, which has a greater urban population than Saskatchewan, increased from 508 to 603, Saskatchewan from 570 to 667.

The increases in the four western provinces were 1,178, while the decreases in the eastern provinces amounted to 1,138. Some of the difference, of course, would be due to difference in divorce legislation.

Daring Flight Proposed

Picard Plans To Make Balloon Ascention From Hudson Bay Next Summer

Prof. Auguste Picard, the only man who has looked twice upon the north from 10 miles above it, plans to ascend to the stratosphere again next summer from the northwest shore of Canada's Hudson Bay. He will make a difficult flight than the first two, for the winds blow across northern Canada might drop a balloon in wastes where he would be inaccessible as anywhere on earth.

Nevertheless, as soon as the Belgian scientist has finished calculating the probable results of his ascensions, he will begin preparations for the third experiment.

"We plan to take off from the northwest shore of Hudson Bay, as close to the north pole as we can get," he said, recently. "Our purpose will be to complete the study of cosmic rays at a point where the line of magnetic force penetrate the stratosphere. When we know how the rays act under these conditions we shall be able to make a scientific point."

The professor said that he had risen nearly 50,000 feet, a point where the temperature inside the gondola of the balloon was five degrees below zero fahrenheit, and outside 47 degrees below.

Persian Balloon promotes dainties, charm and beauty. Gaieties in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, carousing, soothing and relieving all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-like in texture. Truly a perfect toilet requisite for every discerning woman.

Windmills In England

Artist Discovers More Than One In The Netherlands

Windmills are usually given to Holland, but facts are not in accord with popular belief. An artist of London, in Lincolnshire, England, K. C. Wood, has discovered that England has over two thousand windmills and that there are only 1,000 in the Netherlands. Wood, who was busy painting them before they disappear. He has done 200, and while he has been at work more than 100 windmills have been pulled down. Lincolnshire leads with one hundred and seventy windmills.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Gray's Worm Expeller, an excellent remedy.

Trains Ignore Town

Although a college town, no trains bring students to Olivet, Mich., since the advent of the motor bus and automobile. No passenger trains pass within 100 miles of Olivet. Mail is picked up from the books. One freight train stops daily for parcel post and express.

Introduces New Trade

Matress-Walker First Of His Kind, Says One

A maddison road and a first-class matress have one thing in common. But only one, of course, if the matress is made and sold as such.

It is, The New Yorker tells us in an editorial note, a slight crown in the middle; and out of this crown a slightly raised matress, known as a rumble matress, has been an unusual career—matress walking.

This crown, or ridge, The New Yorker tells us, "is to prevent the matress from developing as time goes on, a gully or gulch where the sleeper's body rests." A certain lady, however, it is shown, has been so successful in her career that she received a matress matress into her home the other day.

"Seeing a bulge down the middle, she thought something was wrong, and phoned the makers of the matress to send right over." Continuing the story:

In an hour or so, Harmon Rumble arrived, pulled the matress on to his knees, covered it with burrag, took off his shoes, and began slowly walking up and down on the matress. This prank delighted the lady and she took off her own shoes, thinking to join in. Mr. Rumble discouraged her. He takes his work seriously.

No jumping up and down, nothing like that. He walks in a straight line, furling after furling till the matress is level.

A furling is one-eighth of a mile. Mr. Rumble is the only matress-walker in the trade, says The New Yorker, as it proceeds with its account of this remarkable vocation.

He does walking in winter, and in his regular work it would take two or three weeks of steady sleeping on a matress to wear off the crown that Harmon Rumble can walk off in an hour or so.

He gets two or three calls a month to go matress-walking—more calls in summer than in winter, he says. In November than in any other month. He calls his visits "sittings."

Sometimes one sitting is enough to level off a matress, sometimes he has to go back. He walks two or three furlings at a sitting.

Adopt Uniform Type

For Braille Readers

Anglo-American Agreement Means Water Selection Of Books

Even the blind are widely fond of mystery novels and detective "thrillers," according to officials of the National Library for the Blind, who have just announced the details of an Anglo-American agreement for a uniform type for all Braille books. It means that American and English blind persons henceforth will enjoy a wider range of books from which to select.

Detective stories, American crime stories, will be the chief importation of Braille books into England, it is expected. Library officials say that blind readers have a great variety of tastes, but detective stories are the most popular.

American delegates travelled to London to arrange the final details: R. B. Irwin, executive director of the American Federation for the Blind; G. F. Morgan, executive of the American Association of Workers for the Blind; and L. W. Bodenberger, Illinois school for the blind.

Permit Is Required

Railway Constables Check All Trains Going To Churchill

Going To Fort, Churchill, the terminal point of the Hudson Bay Railway, is like a visit from Windsor to Detroit. Railway constables, armed with all trains en route to Churchill, had ask to see the permits of the passengers. Instead of the familiar "Where were you born?" or "Where were you born?" in the United States Immigration men, the traveller to Churchill hears, "Permits please." A few hardy souls have tried to get up north without the necessary permission. But most people realize how unpleasant it would be to be stranded at Hudson Bay. It is just as well the Government exercises such close supervision. The officials have enough on their hands trying to make things go in Churchill, without being burdened with the problem of looking after a few hundred men who made their way north, and who are now men of substance nor prospect or talent—Border Cities Star.

Valuable Bird's Nest

At Crater Lake National Park, the discovery of a "camp robber," or Oregon Jay nest, has caused a stir in ornithological circles. So rarely are they found that an eastern ornithologist has posted an award of \$100 for the location of such a nest.

An Oasis Of Beauty

New Park In The Cypress Hills Of Saskatchewan

The moraine on the south road out of Maple Creek, Saskatchewan, climbs 1,500 feet to the newly created Cypress Hills Provincial Park, an area of eighteen square miles of pine country, and a most beautiful view of the south of the town. Here have been established by the government a forest reserve and game sanctuary. The streams are clear and cool, well suited to the rainbow and Loch Leven trout fry placed in them some years ago. As a result of the war between the Cypress, Assiniboine and Red rivers, this area became a "No Man's Land," was little hunted and became a haven for wild life, and to this day it has been a favoured spot. The traveller is hardly aware of approaching the park, until suddenly toppling the crest of hills there breaks into view a beautiful scene of forest and stream. It is truly an oasis of beauty, located in the Cypress range of broken hills, scars from deep ravines, fantastic crags and rounded elevations.

Dams placed in Belanger and Lone Pine creeks, tributaries of the Frenchman River, which flows into across the Montana Border, have created two charming lakes, 4,000 feet apart, and a certain part of the Belmond and Loch Leven, having a water area of approximately 200 acres. In addition to rustic bridges, the park includes the woodland paths in the new park, there will be a commodious for the vacationist that includes splendid camp sites, a sixteen room sleeping building, and a nearby kitchen house.

Perils Of Motor Fatigue

Great Risk Of Accidents When Driver Is Drowsy

Regulations now demand that drivers of motor trucks shall remain on duty a certain period of time, so that there may be less risk of their falling asleep at the wheel and bringing injury to themselves or others on the road. It is a sensible provision, the full force of which is revealed in the number of highway accidents directly traceable to fatigue on the part of drivers, and if it were possible for operators of private motor vehicles voluntarily to adopt the same rules, there is no doubt whatever that there would be a marked lessening in the number of traffic accidents. Safe operation of motor vehicles necessitates constant vigilance on the part of driver. It cannot be carried out without great risk, especially on much-travelled roads, if the driver ever nods at the wheel and if he is so overcome with fatigue that he falls asleep, the consequences may be (and very often are) most disastrous.

Ex-Kaiser Owns Church

Title To Property Has Been Held For Many Years

Former Kaiser Wilhelm owns a church in Berlin, North Germany. It was the 75th anniversary of the German Evangelical Church of Marienbad was observed a letter of congratulation was sent to Wilhelm at Doorn. He made the pastor of the congregation a member of the Order of Hohenzollern.

There are two valuable windows in the church. These were presented by the Kaiser on the 50th anniversary of the church 25 years ago. Wilhelm was the exalted ruler of the German Empire at that time. He has held title to the church property for many years. That he still keeps in close touch with affairs is indicated by the letter sent the congregation for the anniversary—London Daily Express.

The French Asthma Remedy, since asthma existed there has been no lack of much heralded remedies, but they have all failed to give the patient the ever-giving reputation of Dr. J. C. Hamilton's Asthma Remedy.

It gives it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on its own merits, and making new converts.

Luxurious Car For Boy

Built To Order For Young Son Of Indian Prince

What is described as the most luxurious car ever built to order for a boy has been completed in England for the eleven-year-old son of an Indian prince, the Maharajah of Johore. It is the most luxurious car ever made, and will drive the car 75 miles on a gallon of gas. The miniature seats, as well as the steering wheel and controls are built to order for the boy. All aspects save one of the car might typify the fondest day dream of a young boy. The Maharajah has ordered a special gear for his son, and will limit the driver's speed to 35 miles an hour.

WOMAN LOSES 28 lbs.

Trips Upstairs Like a 2-year-Old

A woman writes: "Three months ago, after much argument, I was persuaded against my will to try Dr. Williams' Pink Pills for Pale People, which was 22 lbs. I had tried other pills, but they had no effect. After three weeks of Kruschen I had lost 2 lbs. A week, and I felt five years younger. I was able to do a great deal of different work. My age is 37 years. I have now lost 28 lbs. To date, and while before, to go upstairs was a great effort, now as my husband says, 'trip up like a two-year-old.'"—Mrs. J. G. H.

Kruschen salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled you will give rise to rheumatic and other body poisons. And Nature is liable to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty lumps. Unlike most salts, Kruschen is not merely a laxative. It is a combination of salts which will produce a beneficial effect upon every organ, gland, nerve and fibre of your body.

Reward Wheat

Is Finding Fear In A Number Of Saskatchewan Areas

Reward wheat is finding favor in an increasing number of Saskatchewan districts according to Prof. J. H. Harrington, professor of plant diseases at the University of Saskatchewan. Several farmers on the heavy soil north of Moose Jaw report better results with reward wheat than with the common wheat. At Kryder, R. Ramsey, extension worker of the University of Saskatchewan, found that Reward wheat was replacing the common wheat. Gernet wheat had lodged badly and shows considerable rust this year, particularly in the lodged spots. The common wheat has a better crop and cutting was well advanced.

Dr. Harrington has returned from a trip of 1,800 miles in the province chiefly under a certain part of the award of Reward wheat and Marquis wheat grown side by side at a number of points in the province.

A Colony Of Dwarfs

Everything Built On Small Scale In Saskatchewan

In a southeastern suburb of Berlin a colony of some fifty dwarfs has established a miniature town. Everything for the little people is on a small scale. Small houses with small rooms filled with small furniture. The inhabitants are mostly stage folk. They are very friendly to company, and they are very proud of their recognition of their village by the postmaster-general. He has given authority for the building of a small post office to be called Zwergstadt, or Dwarf City. The modest citizens have planned their tiny houses not only for their own comfort, but to exclude persons of normal height.

It Has Many Qualities

The man who possesses a bottle of Dr. Thomas' Electric Oil is in the greatest misfortune. It will relieve a cough, break a cold, prevent a sore throat, it will reduce the swelling from a sprain, relieve the most persistent rheum, and it will speedily heal cuts and wounds. It is a medicine chest in itself.

Logical Deduction

An admirer describes an actress as "having teeth like stars," which causes The Toronto Star-Journal to remark that "lots of us have molars that have been coming out at night since I don't know when." Anyway, it is an interesting comparison, and if teeth are really stars, perhaps the milky way is just some kind of heavenly toothpaste.—Toronto Star.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Ahead Of Dominions

It may amuse some people to learn that the value of the Dominion Trust sold as the farms of the United Kingdom except that of agricultural production in either Canada or Australia. For the average pre-depression year, it is estimated by a writer in the London Times at \$300,000,000 as against \$275,000,000 in the Dominion managements.

The nest of an American eagle weighs from 10 to 12 pounds.

Think of it—two extra cord plies under the tread—Gum dipped cord construction—Scientifically designed non-skid tread—which give you 25-40 per cent longer mileage at no extra cost. And every FIRESTONE Tire carries a lifetime guarantee against defects in material and workmanship.

Never before could you get so much tire for your money

UNITED GRAIN GROWERS LIMITED

A dividend at the rate of five per cent has been declared on the paid up capital stock of United Grain Growers Limited for the financial year ending July 31, 1932.

Cheque will be mailed on September 1st, 1932, to shareholders of record as of July 31st.

By order of the Board of Directors.

R. S. LAWR,
President.

Winnipeg, Manitoba,
August 29th, 1932.

one who cannot control his own passions, who is given to drinking, gambling or any other vice or who makes such inroads on social life as Manitoba has suffered, is a long way from an educated man though he possesses diplomas from many of the best institutions. Antiquarian information nor scientific research will not prove socially beneficial to the man with a moral kink. To train him is only to make him the greater foe of society. Other forces must deal with this problem. So while we continue to push to the limit opportunities for the academic training of our boys and girls, let us remember that schooling in itself is not enough and that the work of the school is very limited. To treat it, as too often it is treated as the "cure" all for everything that may befall our young people later in life, is a sad mistake.

UNUS SOLUS.

The Alberta Pacific Elevator System

The Alberta Pacific elevator in this district is part of a system of 375 country elevators, coal sheds and flour warehouses located in principal grain growing areas throughout Alberta, Saskatchewan and Manitoba, and operated by The Alberta Pacific Grain Company, Limited. Terminal elevators of the Company at Vancouver have a capacity of more than 6,000,000 bushels. In addition the "A.P." has terminal elevator connections at the head of the Great Lakes and office forces in Calgary, Winnipeg and Vancouver.

The Alberta Pacific and predecessor companies commenced business in 1901 in territory now part of the province of Alberta. What was then in that area was then in its infancy. What was to develop into the "A.P." system was brought into being by John I. McFarland, then a young man yet to earn his reputation in the grain trade. His record of fair-dealing with all farmers and customers who came in contact with him earned for him an

enviable reputation which he carried throughout his progress and success in the Trade. The Company soon expanded to all the principal grain growing areas of Alberta, and into Saskatchewan and Manitoba.

With the commencement of movement of grain through the Port of Vancouver, upon the completion of the building Panama Canal, the "A. P." in 1924 became a pioneer in the development of the western movement of grain.

At its inception the "A. P." management realized the great asset of a grain company was personal contact to the greatest possible degree with its customers. The door of the General Manager, John McFarland, was always open to any farmer, to pass the time of day or to assist in the settlement of any difficulty being experienced in connection with the handling or marketing of grain.

When financial control of the Alberta Pacific changed hands in 1929, John McFarland retired from active participation in the grain trade. Mr. McFarland devoted his time to his private interests until in 1930 he was called upon by the Government of Canada to take charge of the liquidation of wheat stocks held by the pools.

In 1930 James R. Murray, who had built himself an enviable reputation as an executive of United Grain Growers Limited, was called upon to take over the General Manager's ship of the "A.P." following retirement of the Stewart interests from control of the company. Mr. Murray came to the company well known to the agricultural populations of the West and with a record of achievement in the extension and development of the U. G. G. throughout Alberta and Saskatchewan.

The policy of fair-dealing and direct contact with its thousands of customers, so well established by the founder of the "A.P." system, is that of the present management headed by Mr. Murray.

Favorable development of this year's crop on the prairie provinces is noted by the Canadian Pacific Railway's weekly report issued recently by the Agricultural Department in Winnipeg. Most of the wheat in Manitoba and Eastern Saskatchewan is headed and elsewhere ranges between advanced soft bladed to headed stage. Fall loss has been only local and is scattered districts.

Bob Davis, roving columnist of the New York Sun, and probably the most travelled newspaperman in the world, has been staying at the Banff Springs Hotel on his way back from Hawaii, accompanied by Mrs. Davis. Mr. Davis has a fair for the unusual, and will likely use a good deal of good material for his column among the old timers of the Rockies.

Taxation comparisons in connection with motor vehicles and railroads should take into consideration that the railways pay for their own roadway, and also to some extent for the roadway used by their motor vehicle competitors, says the "Traffic World". This brings in the question of how much the motor vehicles should pay for the highways and whether they are doing it. (653)

Fresh Killed Meats

We are in a position to supply you with Choice Meats for Harvest at a very close price.

You will always find the right cut to satisfy you.

WE MUST BE IN A RUT

We happened to be in a place of business the other day and on the floor was a sack containing some round sticks of wood about 36 inches long someone gave the sack a kick and said "what are these" The answer was "baseball bats" The questioner replied "well for all the baseball games one sees in this town, I did not know what bats looked like."

CHEAP FUEL

Our cheaper fuel is meeting with great success. In times like the present a saving of any kind is worth going after. This fuel is worth a trial at least.

With the continuance of damp weather this fall more power will be required from your engine to run your separator. Don't forget we have just the power unit in the Ramsey "G" to meet the requirements of the toughest jobs to handle.

Try a stick of our belt

dressing for your slipping belts. It's mighty sticky dope and clings well to the pulley.

Teacher: Why Tommy surely you know what the word mirror means. What do you look at after you've washed, to see if your face is clean?

Tommy: The towel matam.

Where you want to use refined gasoline in your motor, don't forget there is more hours' work in a drum of our new Green Super Power Gasoline. Its first the product to remedy minor trouble in your failing motor.

Schooling or Education?

Lovers of learning have been uncomfortably disturbed by news that university trust funds in Manitoba have been molested. Loss of money is always regrettable, misappropriation worse but coming from academic circles there is something altogether too gruesome about it.

The Canadian people have good reason to be proud of the splendid way in which this new country has cared for the schooling of its children. And this must be maintained at all costs. Nor have we yet reached a satisfactory standard of secondary and university training. There are still many young folk who could use this to good advantage but have not been able to secure them.

But there is one phase of this work which is too often overlooked. A high school or university training may be a long way from an education. The
